

Crisis Logistics are a broker service, working out of Northamptonshire. We transport goods across the UK and Europe using approved suppliers.

We will operate in compliance with all relevant environmental legislation and we will strive to use pollution prevention and environmental best practices in all we do.

We will:

- Integrate the consideration of environmental concerns and impacts into our decision making and activities.
- Promote environmental awareness among our employees and encourage them to work in an environmentally responsible manner.
- Review route planning and best vehicle usage across our available fleet, with the aim of minimising empty miles and emissions.
- Reduce waste through re-use, recycling and by purchasing recycled, recyclable or re-furnished products and materials where these alternatives are available, economical and suitable.
- Promote efficient use of materials and resources throughout our facility including water, electricity, raw materials and other resources, particularly those that are non-renewable,
- Avoid unnecessary use of hazardous materials and products, seek substitutions when feasible, and take all reasonable steps to protect human health and the environment when such materials must be used, stored and disposed of.
- Where required by legislation or where significant health, safety or environmental hazards exist, develop and maintain appropriate emergency and spill response programmes.
- Communicate our environmental commitment to clients, suppliers and the public and encourage them to support it.
- Strive to continually improve our environmental performance and minimise the social impact and damage of activities by periodically reviewing our environmental policy in light of our current and planned future activities,
